BIL 142 LAB 1

Design a "Student" class which has
Member Fields
- Student No
- A Midterm Grade
- A Final Grade

Member Functions
- Getter Setter Functions for all Fields.
- ComputeYearEndGrade (%40 MidtermGrade, %60 Final)

Implement
- CompareStudents(Student1, Student2) function via "friend" method.

Write a constructor with 3 operands given in Member Fields part above.
Write a destructor function
Important: Add comments to your code and at the top of your code note which compiler you're using in a comment
Suggestion: Writing a main function which tests this constructor and all functions can be useful.

Upload your codes as zip file to 'uzak'.(deadline 21:10)
